

VICWEST

RESIDENTIAL PRODUCTS

For over 100 years, VICWEST has been producing the very best in roll-formed pre-painted Steel Roofing. The distinctive look of beautiful VICWEST roofing on a home or cottage really does make a difference. Now VICWEST can offer you the choice of four distinct Residential Roofing systems:

VIC/ELITE and PRESTIGE are classic standing seam roof systems. VIC/ELITE is available with either a P.V.C. coating, a COLORITE® paint system in a wide variety of colours or a Galvalume™ Plus finish. PRESTIGE can be supplied in COLORITE® or with a Metallic Copper paint finish. SUPER VIC and ULTRA-VIC are also available in our extra-durable, better-weathering high-tech COLORITE® coating, helping to make "looks like new!" last longer.

IMPRESSIONS PRE-PAINTED and DIMENSIONAL SERIES GRANULAR FINISH are quality residential roofing systems providing the look of shingles and the long and robust life of steel.

GERARD STONE-COATED steel roofing gives you the traditional look of shingles with architectural styling and a strong aesthetic appeal, both backed up by solid quality.

All these superior products resist summer's heat and a Canadian winter's cold to keep your home dry and comfortable for a lifetime.

VICWEST also supplies a variety of RESIDENTIAL PLASTIC products, including SUNTUF® Corrugated Polycarbonate Panels in several degrees of Light Transmission, SUNTOP® Corrugated Foamed Polycarbonate, and PALIGHT® Trimboard, Column Wraps and Victorian Accents.

"TRIMBOARD - Works like wood!"

Planning a new Deck or Dock or just renovating the one you have? MILLENNIUM Composite Decking is the product for you. This decking is stain, mould, mildew and fire resistant, will not rot and never needs painting. Available in three attractive colours, it comes with a 20-year limited non-prorated warranty.
