From light commercial to residential applications, the ArrowLine Permanent Metal Shake™ is the next wave in roofing and siding.

the next wave in

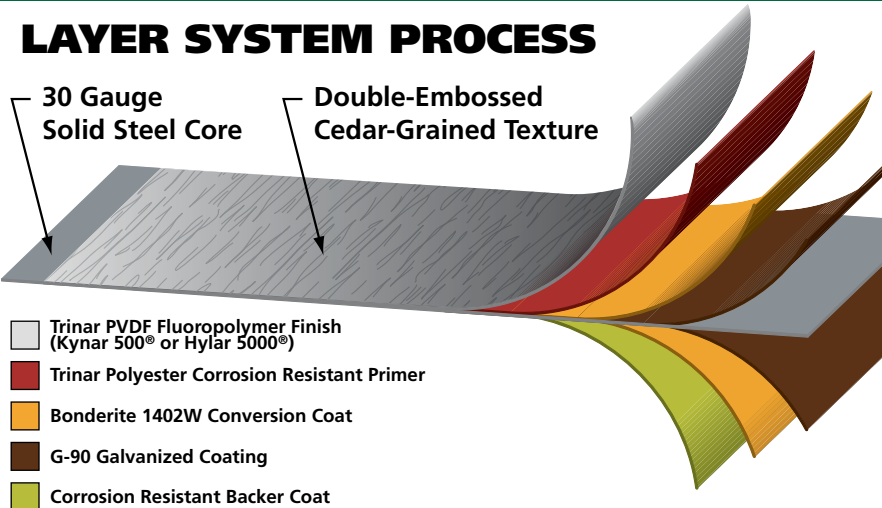

me

The beauty of traditional shingles — the strength and durability of steel.

ArrowLine's unique 4-way interlocking system withstands winds up to 160 mph, has the best hail rating available, and qualifies for lower insurance rates through some providers.

ArrowLine Permanent Metal Shakes are not just brute strength — they are available in 11 EnergyStar approved designer colors with matching trim for an aesthetic statement like none other.

Design and Durability

ArrowLine Permanent Metal Shakes™ were developed for roofing and sidewall applications. EDCO utilizes the latest technology to be environmentally safe, easy to install, and a cost-effective choice.

It's more than just an ordinary shingle. Unlike traditional roofing products, ArrowLine Shakes will not warp, split, peel or crack. Our products have been successfully tested in winds in excess of 100 mph. They easily withstand frigid north woods winters as well as the blistering southern sun. Coated with a deluxe KYNAR 500® finish to maximize color retention, ArrowLine Shakes are available in a full range of 11 EnergyStar approved standard colors. The unique double embossing pattern adds panel strength strong enough to be walked on and can be applied over an existing roof, thereby reducing installation costs.

Excellent Performance

Arrowline Shakes have a unique 4-way locking system that allows them to be installed quickly and easily which helps keep labor costs to a minimum. This 4-way system locks out the harshest of weather conditions. Permanent and virtually maintenance-free, an ArrowLine roof will last for years to come without incurring typical upkeep expenses.

The next wave in lasting building materials should make ArrowLine your first choice for your project.

ArrowLine® Coordinating Colors

Coated with a deluxe KYNAR 500® finish to maximize color retention, ArrowLine Metal Shakes are available in a full range of standard colors.
