

Rustic Detail of Hand-Split Wood Shake

The rustic beauty and architectural detail of a thick, rustic, hand-split wood shake can endure for decades with DECRA Shake XD. Even the best traditional wood shakes weather quickly and colors dull after normal exposure to the elements.

Traditional shakes require extensive maintenance and chemical treatments to preserve the original appearance and achieve even minimal fire resistance. Wet/dry cycles induce cupping and warping which results in loosening around the fasteners to such an extent that wood shakes aren't warranted against wind uplift at all, and walking on a wood shake roof for maintenance can often cause more problems than it solves.

DECRA Shake XD stands up to hail, rain, fire, storm debris, and even hurricane-force winds while retaining the new wood shake appearance in any climate.

Strength Against the Elements

Wind
Up to
120 mph

Hail
Class 4
Impact Resistant

Fire
